Cash demand reported to have shown market improvement, notably at Chicago, where heavy sales were closed. Everyoning relating to the progress of the winter wheat crop was eminently favorable, and in the Northwest conditions were reported as highly satisfactory.

THE BOSTON MARKET

A fair cash demand and light country offerings helped the market, as did reports of unsatisfactory weather conditions bords of the helt.

Inglis in a report to Logan & Bryan said that the excellent promise of a month ago in the Southwest is fully maintained. Northwestern and southwestern counties of Kansas have made a decided improvement, with a smaller loss in acreage than expected. Cutting will be about ten days earlier than usual

Modern Miller reports that the winter wheat crop is making reasonable progress under almost ideal weather conditions. The outlook is so uniformly good that nothing short of a calamity to the crop can prevent a large yield. Rains alternating with warm weather and sunshine

trading very light; not a single local stock traded in to the extent of 1.000 shares price movements were small, with closing prices frregular. THE CHICAGO MARKET

GOSSIP OF WALL STREET.

Vesterday was the twelfth analyersar)

of the Northern Pacific paths and apparently the stock market was determined to cele Bosion, May 9 - The opening tone was goes pof the Street and to the fact that passed away, namely, J. P. Morgan, E. H. Harriman and James E. Keene. One fact which may have intensified the apathy was the knowledge that there will be noth-ing done in the foreign markets during the next day or so on account of the Whitsun-tide holidays. The London Stock Exchange will remain closed until Tuesday. So general was the impression that dulness in the market will continue that a considerable number of people left the financial district early with the intention of taking a long at solution.

Die Rochte Zeit Zu sterben.

According to the Nietzschenn philosoph cation of this principle of choosing a proper time to die to present day conditions in the financial world might prove to many that could invest his insurance money with the vantage. To die a year or so ago would have been a little premature, mistakes might have been made in this regard.

Between 1 15 and 1.30 the ticker machines Exchange used up twenty-six inches of tape, corrected measurement, on account of "pulling." Sales of stock recorded amounted to exactly 800 shares, of which in Amaigamated and 200 shares in Wool actions in bonds. If the dulness had been there would have been a volume of business of 16,000 shares. Between 1 and 2 P. M. 5,060 shares were done, which must be the smallest hour's trading for a considerable

range. In other words price fluctuations have been wide enough to admit of suclife ceasful in and out trading operations, or at least theoretically so. It is questioned, however, whether any great amount of morey has been successful. stock market have at all times been highly point or two until they looked as if stocks were headed for a level five or ten points lower. Then they have reacted sharply and by the time speculators discovered their mistake and managed to cover the market has looked firm enough to go sub-stantially higher. But appearances in these cases have proved just as deceptive. It has been a market which has always seemed very weak to the operator until he sold stocks, and also very strong until he bought
